This standardized risk indicator SRI (Summary Risk Indicator) shows, assuming a five-year holding period, how likely it is to lose money on this product because the markets develop in a certain way or the capital management company is unable to pay you out. The risk of potential losses from future performance is considered low. If market conditions are very unfavorable, it is very unlikely that the ability to execute your redemption request will be impaired.

<sup>1</sup> Net fund assets (gross fund assets less liabilities and provisions).  
<sup>2</sup> Including undeveloped land, property under construction and real estate held by real estate companies.  
<sup>3</sup> Includes all costs (ex transaction costs, management/maintenance costs and finance costs for real estate and real estate companies) debited from fund assets in the financial year 2024/2025, as per 31.03.2025 (TER).  
<sup>4</sup> Includes the estimated costs (ex transaction costs, management/maintenance costs and finance costs for real estate and real estate companies). This cost estimate does not meet the requirements of a cost statement stipulated under supervisory law as per MFID, which you will receive in good time before any order is executed.  
<sup>5</sup> Calculated according to the BVI method (excluding the entry charge, distribution immediately reinvested).  
<sup>6</sup> The model calculation of the performance for the investor (net) assumes an investment amount of € 1,000 and 5 % initial charge, which is received upon purchase and deducted in the first year. The initial charge is a maximum amount that may be lower in individual cases. In addition, custodian fees may be incurred to hold the units, which may reduce the performance for the investor.  
<sup>7</sup> Includes 5 % initial charge.

Investment strategy

hausInvest invests in high-quality commercial and residential real estate, property developments and investments in real estate companies.  
The fund primarily acquires offices, hotels, apartments, shopping centres and logistics real estate, mainly in the strongest economic locations in the European Union.
