

## Facts and figures

Fund's assets <sup>1</sup>	EUR 1,791.86 million
Gross liquidity <sup>2</sup>	EUR 307.59 million
Number of fund investments	43
Diversification of tangible assets	42 locations/6 countries
ISIN/WKN	LU2183939003/KLV100
Launch date	28.10.2020
Initial issue price	EUR 100.00
Fund currency	EUR
Management fee	up to 1.80 % p.a. of net asset value
Depositary fee <sup>3</sup>	up to 0.025 % p.a. of net asset value
Yield based on front-end load	up to 5 %
Total expense ratio for 2024/25 financial year <sup>4</sup>	1.23 %
Estimated total expense ratio for 2025/26 financial year <sup>5</sup>	1.30 %

## Unit price and distribution

Issue price per share	EUR 116.83
Redemption price per share	EUR 111.27
Distribution as of 16.12.2025	EUR 1.94 per share

## Overall risk indicator

1	<b>2</b>	3	4	5	6	7
---	----------	---	---	---	---	---

← Lower risk → Higher risk →

The overall risk indicator shows the likelihood of investors losing money in this product because of certain market movements or the fund's inability to pay investors. This product has been put into "Risk Class 2", because the risk of potential losses from the fund's future performance is classified as low. If market conditions develop unfavourably, however, the fund's ability to pay investors is likely to be adversely affected as a result.

<sup>1</sup> Fund's net assets (fund's gross assets less liabilities and provisions).

<sup>2</sup> Bank deposits and term deposits at fund level and securities (100 % of market value).

<sup>3</sup> The depositary is BNP Paribas S.A., Luxembourg Branch, Grand Duchy of Luxembourg.

<sup>4</sup> The transaction, financing, maintenance and management costs of portfolio companies and investments in tangible assets are not taken into account here. Whenever fund management fees are incurred for the investments held, these are fully taken into account when calculating the total expense ratio. The ratio relates to the fund's average net assets as per the information memorandum.

<sup>5</sup> This includes the estimated costs (without transaction/management/maintenance/financing costs for investments in tangible assets and portfolio companies). This cost estimate does not meet the requirements for an official cost statement under MiFID, which you will receive in good time before the order is executed.

<sup>6</sup> **Statements on targeted returns and the planned distribution of profits are not necessarily indicative of future returns. Past performance is not necessarily indicative of future returns.**

This is a **marketing ad**. Before making any investment decisions, please read the information memorandum and the key information document for klimaVest. You can obtain this fact sheet and other German-language documents (e.g. the current annual and semi-annual report) free of charge – either in writing or as an electronic copy – from your advisor or directly from Commerz Real Fund Management S.à r.l. Please note that Commerz Real Fund Management S.à r.l. may decide to stop the cross-border distribution of klimaVest at any time.

## Investment strategy

The fund's investment objective is to make a positive contribution to the environmental goals stipulated in the EU Taxonomy Regulation, in particular climate change mitigation and adaptation, by investing primarily in sustainable assets in the field of renewable energies (mainly solar and wind power), energy transmission and energy storage. klimaVest aims to generate a financial return, including an annual distribution.<sup>6</sup>

## Performance

Past performance is not necessarily indicative of future returns.

Performance	net <sup>7</sup>	gross <sup>8</sup>
28.10.2020 – 31.05.2021	-3.1 %	1.7 %
31.05.2021 – 31.05.2022	3.3 %	3.3 %
31.05.2022 – 31.05.2023	3.3 %	3.3 %
31.05.2023 – 31.05.2024	4.1 %	4.1 %
31.05.2024 – 31.05.2025	3.5 %	3.5 %
31.05.2025 – 31.05.2026	3.0 %	3.0 %

## Current diversification and value added

Stage of development	Portfolio capacity
 <b>39</b> investments in the portfolio	 <b>816 MW</b> (total rated capacity) in the portfolio <sup>9</sup>
 <b>4</b> investments under development	 <b>163 MW</b> (total rated capacity) under development <sup>9</sup>
	 <b>320,440 households</b> potentially supplied with green electricity per year <sup>10</sup>

## Allocation by country

## Asset allocation<sup>11</sup>

<sup>7</sup> The model calculation of the fund's performance for investors is based on an investment amount of EUR 10,000 and a 5 % front-end load, which is collected once upon purchase and deducted in the first year. The front-end load is a maximum amount and may be lower in certain cases. In addition, custody fees may be incurred for the safekeeping of shares, which may reduce the fund's performance for investors.

<sup>8</sup> This has been calculated according to the BVI methodology (without front-end load and with distributions immediately reinvested).

<sup>9</sup> This is based on the entire portfolio of assets.

<sup>10</sup> This has been calculated based on the amount of electricity fed into the grid and the average electricity consumption of households in the relevant countries of investment. Enerdata database (2019). The target may be exceeded, or it might not be fully achieved.

<sup>11</sup> The shares of wind, solar, and power grids are based on the value of direct and indirect equity investments, including shareholder loans; the remaining portion represents liquidity.
